PDF CREATOR PLUS FEATURE HIGHLIGHTS
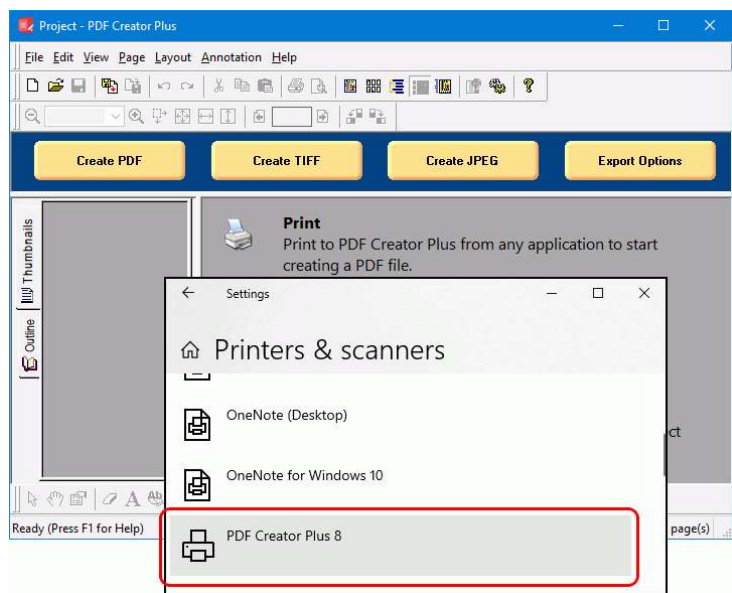

- Easily merge multiple TEXT files into a single PDF.
- Drag and drop PDF files to quickly add your TEXT file to an existing PDF file.
- Preview, add, organize, and delete unwanted pages before creating your PDF.
- More than just PDF, PDF Creator Plus can also create TIFF, JPEG, and BMP images.
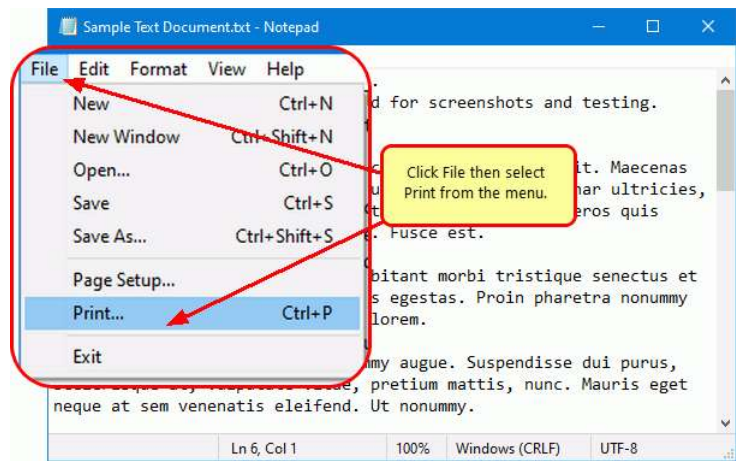

STEPS FOR CONVERTING TEXT TO PDF

1. Download and install a free trial to try it out or install and activate your purchased copy.

As a virtual printer, PDF Creator Plus can create PDF files by simply printing to PDF Creator Plus instead of your regular printer.
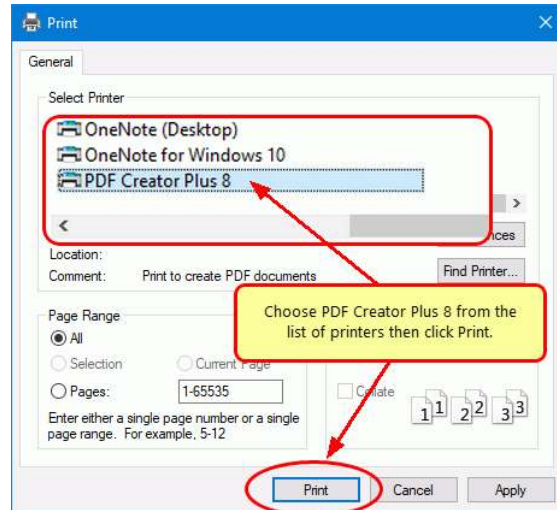

Combining the virtual printer with the **PDF Creator Plus app** allows you to convert to PDF from a single document or many different documents from different applications.
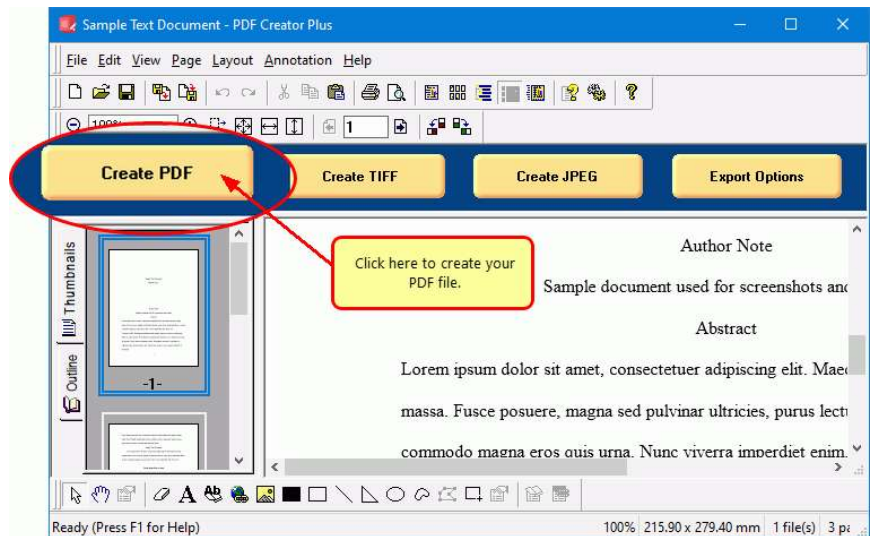

2. Open your TXT document and then select **File -> Print** from the application menu. Text documents are commonly opened with *Notepad*, *WordPad,* or *Microsoft Word*.

**3.** Choose **PDF Creator Plus 8** from the list of printers then click the **Print** button.

4. PDF Creator Plus will display the printed pages from your TEXT file. Click the **Create PDF** button to convert your TEXT to PDF now or continue printing TEXT or other files to the **PDF Creator Plus 8** printer to add more pages.

5. In the **Create File** dialog, type in a name for your new PDF document and choose where to save it. Next, set your options for creating a PDF file:

a. Select **PDF file(*.pdf)** as the *Save as type*
b. Check the **Multipage PDF**, and **Embed fonts** options.
c. If you added hyperlinks or outline information annotations by hand, check the options for **Create hyperlinks**, **Create outlines**, or both.
d. Check the **Open file** option to open your PDF automatically upon creation.
e. Lastly, click the **Save** button to convert your TEXT to PDF.

6. A progress dialog will appear as PDF Creator Plus creates your new PDF. If you need to change your PDF, use the *Cancel* button to stop the process. You can then make your changes and start again.
