

PEERNET Raster Image Printer 7.0

Convert documents and other files into images files.

OVERVIEW

An exceptional image creation tool, the Raster Image Printer 7.0 is a virtual printer that makes creating an image file from any document as simple as printing to a desktop printer. You only need to print your document to the Raster Image Printer 7.0 to create an image file of your choice; this makes it a snap to convert Microsoft Office documents, graphic files, slideshow presentations, accounting spreadsheets, legal files, computer-aided design documents (CAD), or whatever type of file you need to convert.

FREE EVALUATION

Try it before you buy with our no-obligation 30-day trial. The trial is **fully functional**, but all pages are stamped with the phrase "Evaluation Copy".

TECHNICAL SUPPORT

Free unlimited support is provided for the full evaluation period and for the first 60 days from the date of purchase. For a minimal extra fee On-Going Support (OGS) can optionally be bought at the time of purchase. OGS provides unlimited telephone and email support as well as automatic access to all minor and major releases including upgrades for the term of the agreement. The terms of your OGS contract is found on your purchase confirmation.

SUPPORTED PLATFORMS

Both 32-bit and 64-bit operating systems are supported.

- Microsoft® Vista
- Microsoft® Windows 2003 Server / Terminal Server
- Microsoft® Windows XP Home Edition / Professional / Tablet PC / Media Center
- Microsoft® Windows 2000 Professional / Server / Advanced Server / Datacenter Server / Terminal Server
- Citrix® MetaFrame® 1.8 – 4.0 / MetaFrame® XP / MetaFrame® Access Suite

KEY PRODUCT FEATURES

Customized File Naming	Pre-set the file name and where it will be saved or have the driver prompt you each time. Advanced file naming can be used to set customized naming conventions.
Save Options	Creates both serialized (each page of the document saved as an individual image) or multi-page (entire document saved as a single, multi-page image) output.
Compression Options	Minimize your file size with the multiple compression options available for each output image type.
Image Processing Capabilities	Take advantage of the built-in image processing capabilities such as cropping your image to a particular size, or trimming your image to remove white space.
Run Programs and Commands	Specify programs or other commands to be run at the start, at the end, at each page or at the end of the file creation.
E-mail Options	Use the e-mail options to automatically attach your images to an email message, ready for sending. Populate the To, CC, BCC, Subject, and Message fields of the email message with defaulted text and addresses
Supports 26 Image File Formats	<ul style="list-style-type: none">• Adobe PDF (*.pdf)• Graphic Interchange Format (*.gif)• Adobe PhotoShop (*.psd)• CServe Portable Network Graphics (*.png)• Encapsulated Postscript (*.eps)• IBM IOCA (*.ica)• Interchange File Format (*.iff)• JPEG (*.jpg)• Fax, raw (*.fax)• TIFF (*.tif)• Truevision TARGA (*.tga)• Windows Bitmap (*.bmp)• Windows Metafile (*.wmf)• WinFax (*.wfx)• WordPerfect Graphic (*.wpg)• ZSoft DCX (*.dcx)• ZSoft PCX (*.pcx)
