

PEERNET TIFF Image Printer 9.0

TIFF any document!

OVERVIEW

Creating a TIFF image file using the TIFF Image Printer is as simple as printing to your desktop printer.

With highly customizable options, TIFF Image Printer is ideal for faxing and archiving, providing the highest-quality TIFF output in the industry. Options include settings for color and monochrome fax, custom file naming, compression, custom paper size, trimming, cropping and resampling.

TIFF Image Printer specializes in producing the exact TIFF file format you require. While other tools offer many different output formats, TIFF Image Printer offers customizable TIFF specific properties not available in other products - with TIFF Image Printer you get the exact output you require.

FREE EVALUATION

Try it before you buy with our no-obligation 30-day trial. The trial is fully functional, with the exception that all pages are stamped with the phrase "Evaluation Copy" until purchased. Product support is available for the duration of the evaluation period.

SUPPORTED PLATFORMS

Both 32-bit and 64-bit operating systems are supported where applicable.

- Microsoft® Windows 7
- Microsoft® Windows Server 2008 R2
- Microsoft® Vista
- Microsoft® Windows 2008 Server
- Microsoft® Windows 2003 Server
- Microsoft® Windows XP
- Microsoft® Windows 2000
- Citrix® MetaFrame®

KEY PRODUCT FEATURES

[Save Options](#)

Save your TIFF images as either serialized files (one image per page per file) or as multi-paged files (all images in one file). Use the Append feature to combine files or to create sequences of images.

[Custom File Naming](#)

Pre-set the file name and where it will be saved or have the driver prompt you each time. Advanced file naming can be used to set customized naming conventions.

[Color and Monochrome Fax](#)

Produce fax-ready images using standard fax profiles. New fax scaling and alignment options give you complete control over the fax image you create.

[Compression Settings](#)

Color reduction options, dithering methods and individual compression settings for color, indexed, greyscale, and monochrome images combine to give you full control over the file size of your TIFF images.

[Page Processing](#)

Take advantage of the built-in page processing features - auto-rotate your pages, crop sections of your page, automatically trim the margins and adjust the page brightness in one easy step.

[Image Processing](#)

Copy each page of the document to a larger or smaller page with full alignment options. Resample each page to a particular width and height in pixels, as a percentage of the original size, or by setting a new image resolution (DPI).

[Custom Paper Size](#)

Supports user-defined paper sizes allowing virtually any size paper, including large paper sizes for use in AutoCAD programs.

[Email Options](#)

Use the e-mail options to automatically attach your images to an email message, ready for sending. Populate the To, CC, BCC, Subject, and Message fields of the email message with defaulted text and addresses.

[Run Programs and Commands](#)

Specify commands to be run at the start of the print job, at the end of the print job, at each page, and on file close.

[Text Extraction](#)

Includes text extraction capabilities with support for creating ASCII, UTF-8, and UTF-16 encoded files.

[PNSrv9.COM Interface](#)

Easily add file creation using TIFF Image Printer into your workflow with the available PNSrv9.COM Interface.

SUPPORTED IMAGE RESOLUTIONS

TIFF Image Printer supports the following image resolutions:

Image Resolutions		
50x50	60x60	75x75
100x100	120x120	150x150
200x200	240x240	254x254
300x300	360x360	400x400
600x600	720x720	1200x1200
