## Document Conversion Service 3.0

Document conversion in a Windows® service!

Convert a wide variety of commonly used document types to Adobe® PDF and various image formats such as TIFF, JPEG, raster Adobe® PDF, PNG and others with this true Windows® service.

A drag and drop watch folder service with clustering and failover support, a full set of command line tools and a .NET library are included, making it easy to integrate document conversion of Microsoft® Office Suite (Word, Excel, Outlook, PowerPoint, Publisher or Visio) documents, Adobe® PDF, XPS documents and Autodesk® DWG and DWF to name a few.

A highly scalable product, Document Conversion Service allows you to make the most of your system resources with concurrent document conversion and easy customization of all aspects of the conversion process.

### KEY PRODUCT FEATURES

#### [High Throughput](#)

Multi-threaded processing and true parallel conversion allow for a highly scalable product able to process many documents concurrently and to take advantage of the multi-CPU and multi-core systems available today. Easily adjust the throughput for optimal performance on each computer.

#### [Clustering and Failover Support](#)

Perfect for large volume batch conversions and clients requiring 100% conversion stability, Watch Folder Service's clustering capability allows multiple servers to work in tandem on a shared collection of files while providing load-balancing and failover support if a server should go offline.

#### [Folder Monitoring](#)

Monitor any number of *hot* or *drop* folders with individual conversion settings, folder content filtering, add custom commands to run post-conversion with the included Watch Folder Service utility.

#### [On Demand Scaling](#)

Document conversion is fast and efficient while minimizing resource use. Individual converters for each document type are dynamic and self-regulating up to the maximum allowed, starting with a single instance and adjusting up or down as needed to manage the volume of each type of document.

#### [Remote Conversion with DCOM](#)

Distribute your conversion across multiple networked machines, or use the DCOM support for client-server conversion from a web server or a client workstation to a main conversion server.

#### [Extensive Toolset and Sample Code](#)

A full suite of command line conversion tools make it easy to add file conversion to your business procedures, or use the conversion API in the included .NET utility library to add conversion directly into your own code. Samples programs in C#, VB and PowerShell are included.

#### [Desktop Conversion Utilities](#)

Two desktop conversion utilities are included ready to use on client machines. The Drop Files Converter converts files and folders dropped onto its UI and can run post-conversion commands. The Convert File utility is a simple application that converts a single, chosen file using the selected profile. It is also available as sample code.

#### [Accurate Conversions](#)

The application used to create your document is the one the service uses to do the conversion. This guarantees the fidelity of your converted documents. Needed applications include Microsoft Office for Word, Excel and other Office documents, Adobe Reader or Acrobat for PDF documents, and Autodesk® Design Review or DWG Trueview for AutoCAD® documents.

#### [Unattended Conversion](#)

As a full-fledged Windows® service the conversion process runs without the need for an active signed-in user. As a service, the conversion process is monitored and automatically restarted to ensure you are running with minimal downtime.

## FREE EVALUATION

Try it before you buy with our no-obligation 30-day trial. The trial is fully functional, with the exception that all pages are stamped with the phrase "Evaluation Copy" until purchased. Product support is available for the duration of the evaluation period.

## WHAT FILES CAN I CONVERT?

Most of the included converters use the document's native application for the conversion. You will need to have your own licenses of these products where applicable; they are not included with the PEERNET Document Conversion Service.

Document Type	Required Application
Adobe PDF Documents	Adobe Reader X, XI, DC
Design Review Drawings	Autodesk Design Review 2012-2013
AutoCAD Drawings	Autodesk Design Review 2012-2013 with DWG TrueView 2012-2013 also installed.
Excel Workbooks Outlook Messages, vCard Files, and Appointment Files PowerPoint Presentations Publisher Files Word Documents Rich Text Documents Plain Text Files Plain Text Log Files	Microsoft Office 2003 SP3 <i>(with Microsoft Office Compatibility Pack)</i> Microsoft Office 2007 Microsoft Office 2010, 2013, 2016 <i>(32-bit and 64-bit)</i>
Visio Drawings	Microsoft Visio 2003 Microsoft Visio 2007 Microsoft Visio 2010, 2013, 2016 <i>(32-bit and 64-bit)</i>
HTML Files Secure HTML Web Archive	Internet Explorer 8.0 - 11.0
Postscript Files Encapsulated Postscript Files Adobe PDF Documents	Ghostscript 9.05 or later <i>(32-bit only)</i>
JPEG images TIFF images Windows Bitmap images ZSoft PCX images ZSoft DCX images Cserve Portable Network Graphics images Graphics Interchange Format image files Icon Format files Windows Media Photo images	Built-in, no additional applications required.
Outside-In AX (Supports over 500 file formats)	Oracle Outside In Viewer Technology (ActiveX)
XPS Documents	Uses Windows built-in XPS document support, no additional applications required.
PEERNET Passthrough Converter	Built-in, passes the file through the system without converting.

## SUPPORTED PLATFORMS

---

Only 64-bit operating systems (minimum 4GB RAM) are supported.

- Microsoft® Windows Server 2016, Microsoft® Windows 10
- Microsoft® Windows Server 2012, 2012 R2, Microsoft® Windows 8, 8.1
- Microsoft® Windows Server 2008 R2, Microsoft® Windows 7
