

# PEERNET File Conversion Center 5.0

Batch conversion made easy!

## OVERVIEW

### Problem:

You need to convert documents, spreadsheets, web pages, PostScript files, and more into Adobe PDF files or images such as TIFF, JPG, BMP, or GIF.

### Problem Solved:

Able to convert an entire folder of documents as easily as converting a single document, File Conversion Center is an indispensable tool for all your conversion needs. Integrated into your desktop, you have quick access to the conversion tool when you need it, as well as an advanced interface for when you want more control.

## FREE EVALUATION

Try it before you buy with our no-obligation 30-day trial. The trial is **fully functional**, with the exception that all pages are stamped with the phrase "Evaluation Copy" until purchased. Product support is available for the duration of the evaluation period.

## SUPPORTED PLATFORMS

Both 32-bit and 64-bit operating systems are supported.

- Microsoft® Windows Server 2012
- Microsoft® Windows 8.1, Microsoft® Windows 8
- Microsoft® Windows 7
- Microsoft® Windows Server 2008 R2
- Microsoft® Vista
- Microsoft® Windows 2008 Server
- Microsoft® Windows 2003 Server
- Microsoft® Windows XP
- Citrix® MetaFrame®

## KEY PRODUCT FEATURES

<b>Desktop Integration</b>	Integrated into both your desktop and your Windows Explorer application, you can convert individual files or groups of files on demand, quickly and easily.
<b>Dynamic list of supported file type</b>	Convert any file that can be opened and printed by any of the supported applications. As new file extensions are encountered that can be opened, they are added to the list of files types that can be converted.
<b>Custom conversion settings</b>	Convert any file that can be opened and printed by any of the supported applications. As new file extensions are encountered that can be opened, they are added to the list of files types that can be converted.
<b>Customizable conversion settings</b>	Custom conversion settings can be created to meet your specific needs; output file type, resolution, color, serialized or multi-paged files, compression options and output file location, as well as auto-rotating landscape pages, trimming white space, cropping and resizing can all be configured.
<b>Convert folders and all subfolders</b>	Folders can be processed recursively, saving the converted files with the source file, or in a new location with the same directory structure.
<b>Filter folder contents when converting</b>	Folder contents can be filtered by file type to convert only the files you want converted.
<b>Convert and print at the same time</b>	Convert documents into image files and send them to your office printer with the same mouse click, simplifying your workflow process and saving you time.
<b>Batch processing capabilities on the desktop</b>	Convert any number of files, folders, and web addresses. Pause, resume, skip a file or cancel the conversion process from the progress dialog.
