## **PEERNET File Conversion Center**

Batch Convert Word, Excel and PowerPoint to TIFF with File Conversion Center

## **OVERVIEW**

Batch converting your **Microsoft Word** documents, **PowerPoint** presentations and **Excel** spreadsheets to **TIFF** files has never been easier!

With **<u>File Conversion Center</u>** you can convert a single Office document or an entire folder of Office documents with as little as a single click.

File Conversion Center can also create the following file formats:

- Adobe PDF
- TIFF
- JPG
- PNG
- BMP
- GIF
- PCX
- DCX

## STEPS TO BATCH CONVERT OFFICE DOCUMENTS TO TIFF

File Conversion Center comes with 5 predefined conversion profiles for creating **TIFF files**, as well as six other profiles for creating **PDF**, **JPG** and **BMP** images. New profiles can easily be created to meet any custom requirements.

The following steps will use the predefined conversion setting **Medium Quality TIFF** to convert an entire folder of Word, Excel and PowerPoint documents into TIFF files. The new TIFF files are created in the same location as the Office documents; the original files remain untouched in the folder.

**1.** Find the folder of documents on your computer. Below we are using the folder *Feb* 2010 – Sales in the Documents library (or folder) on Windows 7.

**2.** Select the folder of documents with the mouse and then right-click on the image to access the context menu.

- a. From the context menu, select the Convert To menu item.
- b. Another menu will appear displaying conversion options; select Medium Quality TIFF from this menu.

## 3. A progress dialog box Converting to

**TIF** will be displayed while the documents in the folder are being converted. The new TIFF files are created in the same location as the original documents. Click the Close button to dismiss the progress dialog when the conversion is complete.

**4.** A new TIFF file has been created for every Word, Excel and PowerPoint document in the folder.
