

PEERNET PDF Image Printer 11.0

PDF any document!

OVERVIEW

Creating a PDF file using the PDF Image Printer is as simple as printing to your desktop printer. As a virtual printer installed in the Printers and Faxes folder, PDF Image Printer can be accessed from any Windows application. If you can print your file, then PDF Image Printer can convert it into a *non-searchable*, or raster, PDF image.

With numerous customizable options, including settings for color or monochrome output, custom file naming, file splitting, compression, and endorsements, PDF Image Printer is ideal for creating non-searchable PDF files suitable for archiving, emailing, or posting to the internet, and can be read by standard PDF viewers such as Adobe® Reader.

Non-Searchable(Raster)

The PDF Image Printer produces non-searchable, or raster, PDF files where each page of the PDF is generated as an image. The common benefits of this type of PDF are:

- PDF/A compliant
- the document cannot be altered easily.
- can be considered more secure.
- no missing font issues as it is similar to scanned image.

FREE EVALUATION

Try it before you buy with our no-obligation 30-day trial. The trial is fully functional, with the exception that all pages are stamped with the phrase "Evaluation Copy" until purchased. Product support is available for the duration of the evaluation period.

KEY PRODUCT FEATURES

[Save Options](#)

Save your PDF files as either serialized files (one image per page per file) or as multi-paged files (all images in one file). With multi-paged PDF files, file splitting can be used to create sequences of files based on file size or page count.

[Custom File Naming](#)

Pre-set the file name and where it will be saved or have the driver prompt you each time. Advanced file naming can be used to set customized naming conventions.

[PDF Security](#)

Create secure PDF files using 40-bit or 128-bit encryption, password security, and permission levels to restrict access to document contents.

[PDF Compression](#)

Color reduction options, dithering methods and individual compression settings for color, indexed, greyscale, and monochrome images combine to give you full control over the file size of your PDF images.

[Page Processing](#)

Take advantage of the built-in page processing features - auto-rotate your pages, crop sections of your page, automatically trim the margins and adjust the page brightness in one easy step.

[Image Processing](#)

Copy each page of the document to a larger or smaller page with full alignment options. Resample each page to a particular width and height in pixels, as a percentage of the original size, or by setting a new image resolution (DPI).

[Endorsements](#)

Add header and footer endorsements such as text and page numbers to your pages as you create them. Font style, size and color can all be customized.

[Custom Paper Size](#)

Supports user-defined paper sizes allowing virtually any size paper, including large paper sizes for use in AutoCAD programs.

[Run Programs and Commands](#)

Specify commands to be run at the start of the print job, at the end of the print job, at each page, and on file close.

[Text Extraction](#)

Includes text extraction capabilities with support for creating ASCII, UTF-8, and UTF-16 encoded files.

SUPPORTED PLATFORMS

Both 32-bit and 64-bit operating systems are supported where applicable.

- Microsoft® Windows 10
- Microsoft® Windows Server 10
- Microsoft® Windows 8, 8.1
- Microsoft® Windows Server 2012, Server 2012 R2
- Microsoft® Windows 7
- Microsoft® Windows Server 2008 R2
- Microsoft® Vista
- Microsoft® Windows Server 2008
- Microsoft® Windows Server 2003
- Microsoft® Windows XP
- Citrix® MetaFrame®

SUPPORTED IMAGE RESOLUTIONS

PDF Image Printer supports the following image resolutions:

Image Resolutions		
50x50	60x60	75x75
