PDF CREATOR PLUS FEATURES SPOTLIGHT

- Easily merge multiple Excel and other files together into a single PDF.
- [Drag and drop PDF files](#) to quickly merge them with your Excel files.
- Preview, add, organize, and delete unwanted pages before creating your PDF.
- Converting Excel to PDF allows for secure distribution via email or the Internet.
- More than just PDF, [PDF Creator Plus can also create TIFF](#), JPEG, and BMP images.

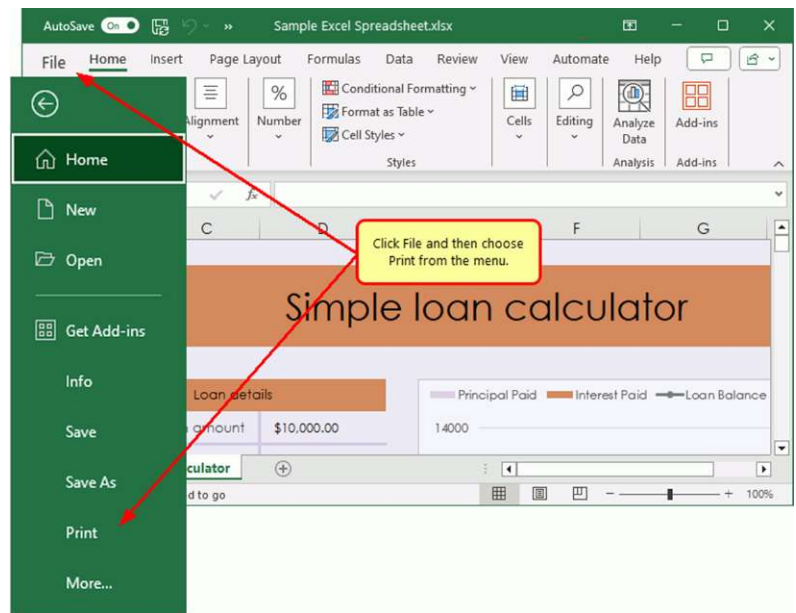

HOW TO CONVERT EXCEL TO PDF

1. [Download and install a free trial](#) to try it out, or [install and activate your purchased copy](#). The setup program will install the **PDF Creator Plus app** and **PDF Creator Plus 8** virtual printer to your computer.

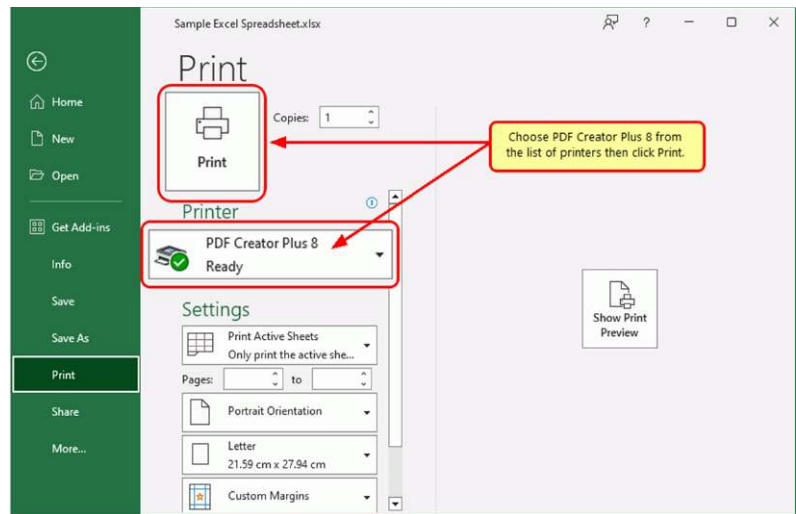

PDF Creator Plus can merge and convert PUB to PDF by printing Publisher files to the [PDF Creator Plus 8](#) virtual printer instead of your regular printer.

2. Open your spreadsheet in Microsoft Excel and select **File->Print** from the application menu.

3. In the **Print** options screen, select any printing options for your spreadsheet. Next, choose **PDF Creator Plus 8** from the list of printers and click the **Print** button to proceed.

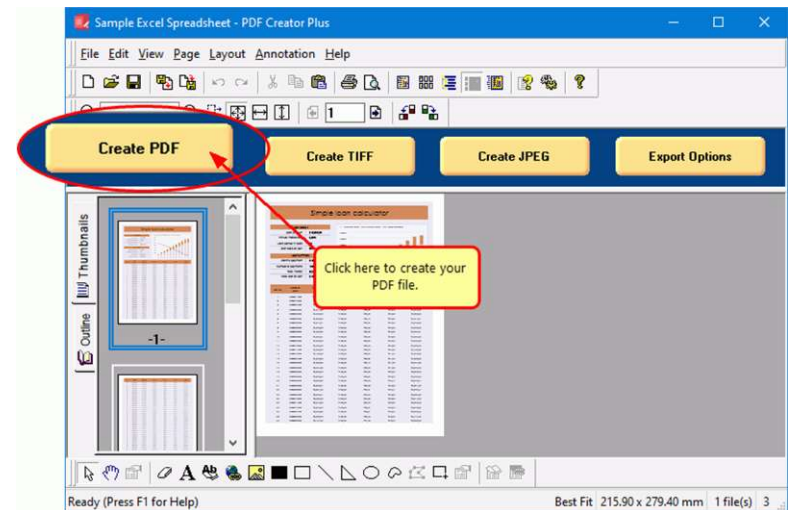

4. The **PDF Creator Plus 8** printer sends the pages from your Excel spreadsheet to the **PDF Creator Plus** app.

In the app, you can add, move, rotate, or delete pages before creating your PDF file. Use the included tools to annotate the pages with text, shape, and images.

From this point, you can create your PDF file now or add more pages by merging PDF files and printing additional files from Excel or other apps.

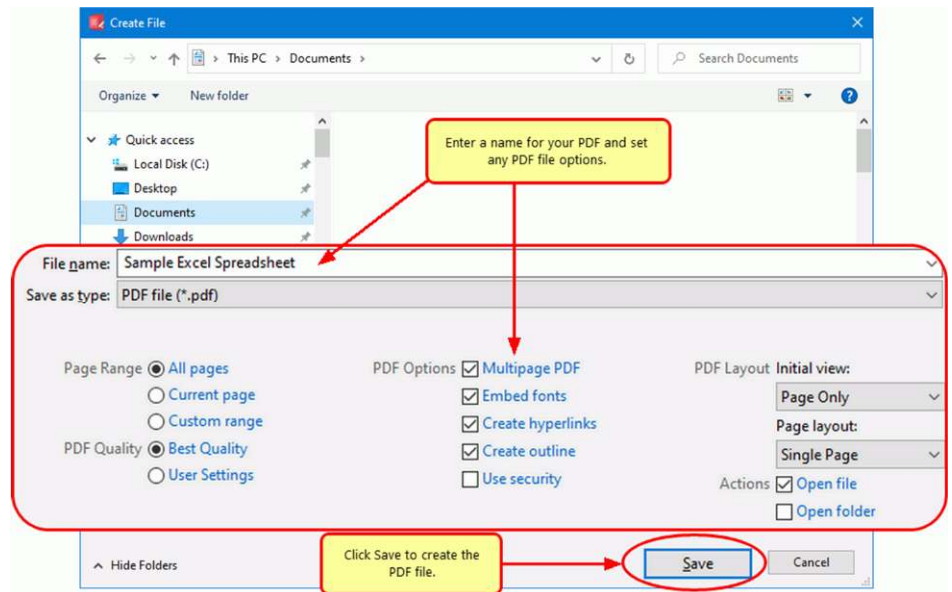

After collecting and organizing all the pages in the app, and you are ready to convert your Excel to PDF, click the **Create PDF** button to start.

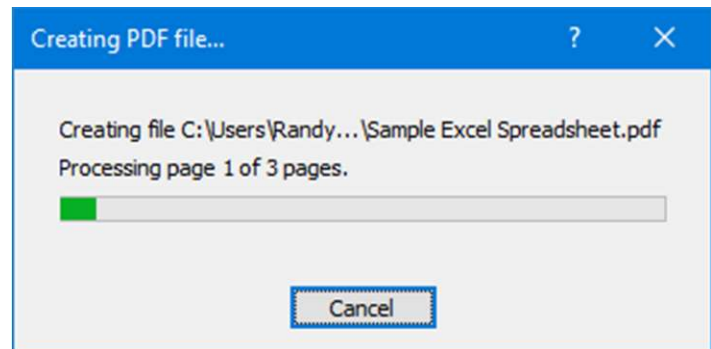

5. In the **Create File** dialog, edit the name for your new PDF file and choose where to save it. The next step is to choose options for your PDF file:

- a. Select **PDF file (*.pdf)** as the *Save as type*,
- b. Check the **Multipaged PDF** and **Embed fonts** options.
- c. If you [added hyperlinks or outline information annotations](#), check the options for **Create hyperlinks**, **Create outlines**, or both.
- d. Keep the **Open file** option enabled to open the PDF automatically upon creation.

Click the **Save** button when you are ready to convert your Excel spreadsheet to PDF.

6. A progress dialog will appear as PDF Creator Plus converts your Excel file to PDF. If you need to change your PDF, use the Cancel button to stop the process. You can then make your changes and start again.

A NOTE ON OUTLINES AND HYPERLINKS

Although printed pages from Excel do not keep any outline or hyperlink information, there are annotation tools for adding outline headings and hyperlinks back on your pages. See [Creating an Outline/Bookmarks in PDF Creator Plus](#) to learn how to add outline information to your pages before creating your PDF. Subsequently, for hyperlinks, see our article [How do I add a hyperlink to a PDF Creator Plus project](#).
