WHY CONVERT DOC TO TIFF?

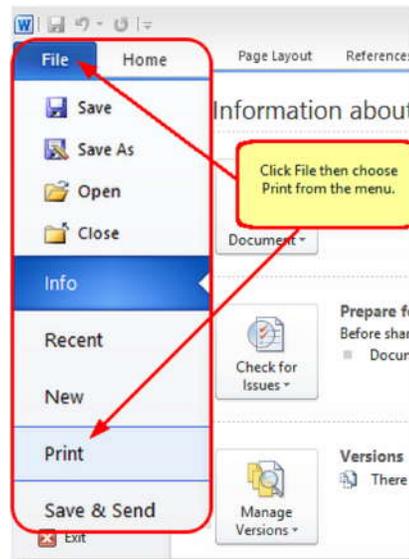

Converting DOC to TIFF images is an ideal way to protect the information in your DOC files as TIFF images are very difficult to alter and can be viewed by virtually anyone. TIFF is a common format for faxing, and is often used in document imaging, document archiving and eDiscovery software.

STEPS FOR CONVERTING AUTOCAD TO TIFF

1. Install **Raster Image Printer** onto your computer. This will create a new virtual printer in your *Printers* folder.

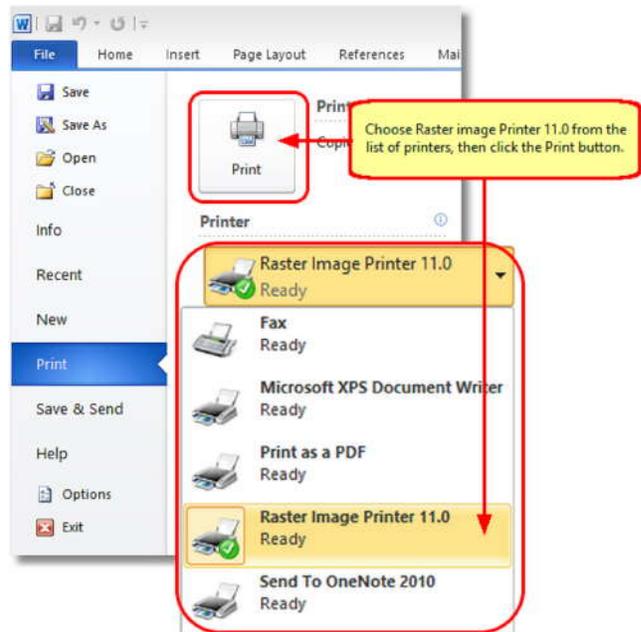

2. Open your document in Microsoft Word and click **File->Print** from the application menu.

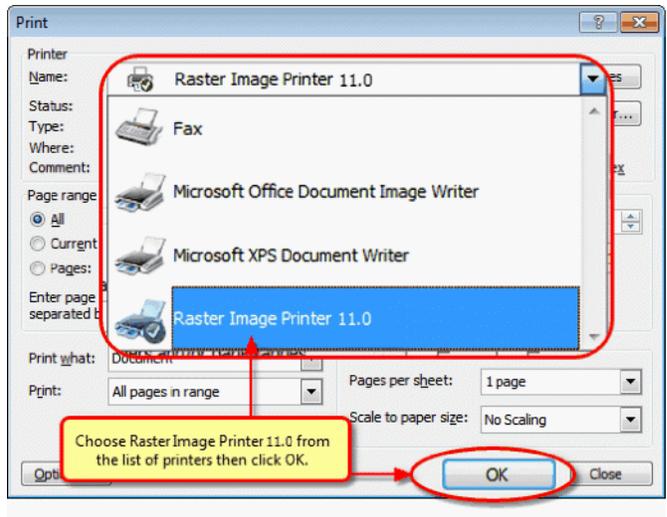

3. Choose Raster Image Printer 11.0 from the printers list, then click the **Print** button or the **OK** button.

- You will see this if you are printing from **Word 2010**:

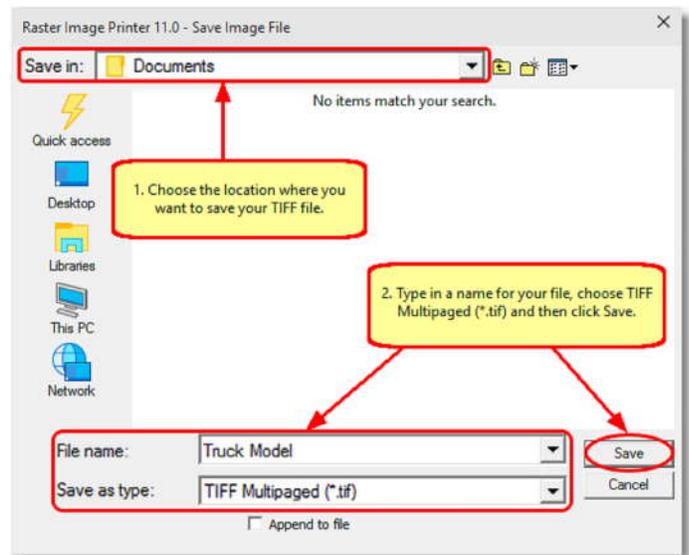

- You will see this if you are printing from **Word 2007 and earlier**:

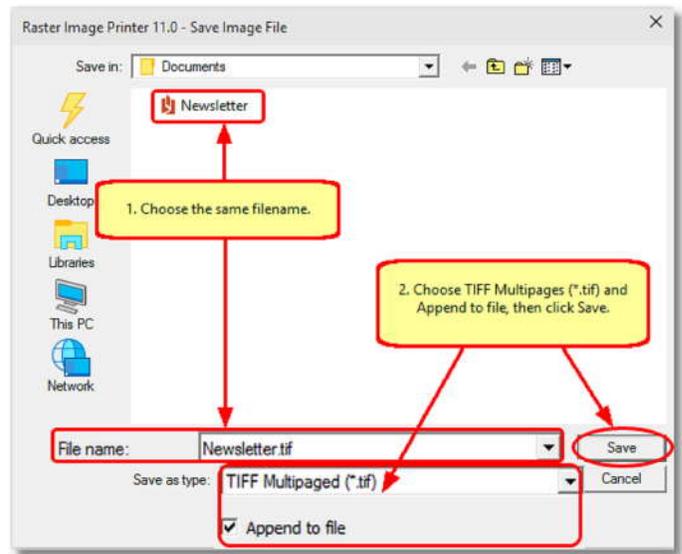

4. In the **Save Image File** dialog that appears:

- Select **TIFF Multipaged (*.tif)** as the output file type and choose where to save your new TIFF image.
- Click the **Save** button to convert your DOC to TIFF.

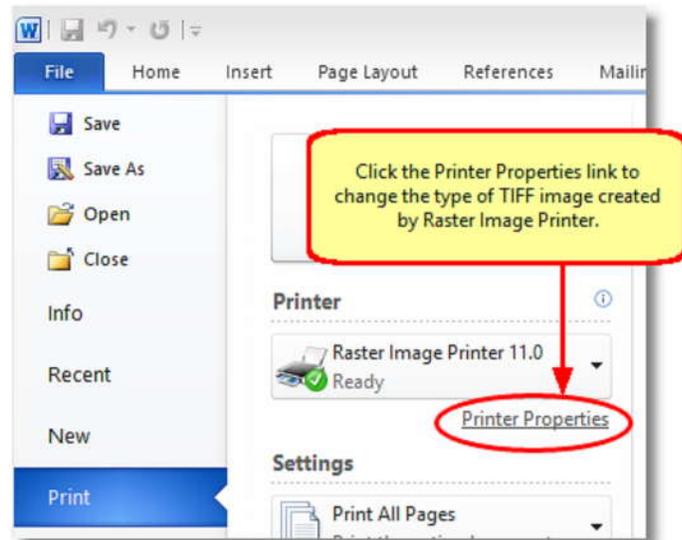

5. Your DOC will be converted to TIFF and saved in the location specified.

6. Merge multiple AutoCAD drawings into a single TIFF with the **Append** feature.

7. Convert DOC into TIFF images that meet your exact requirements with the many options available. The settings used when converting DOC to TIFF can be accessed through the **Print** dialog when you are printing your document. See [Setting Printing Preferences](#) in the on-line user guide for more information.

- Click the Printer Properties link in **Word 2010**:

- Click the Printer Properties link in **Word 2007 and earlier**:
