

PEERNET TIFF Image Printer

How To Combine & Merge Multiple Files into one TIFF Image

OVERVIEW

You can easily combine multiple files into a single TIFF file with [TIFF Image Printer](#).

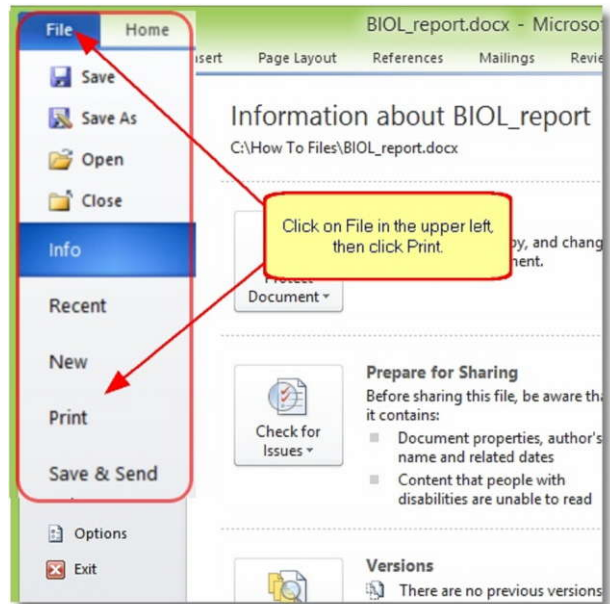

For this example, we are going to print a Word document, a JPEG image and an Excel spreadsheet to TIFF Image Printer to combine into a single TIFF file.

STEPS FOR COMBINING SEVERAL FILES INTO A SINGLE TIFF FILE

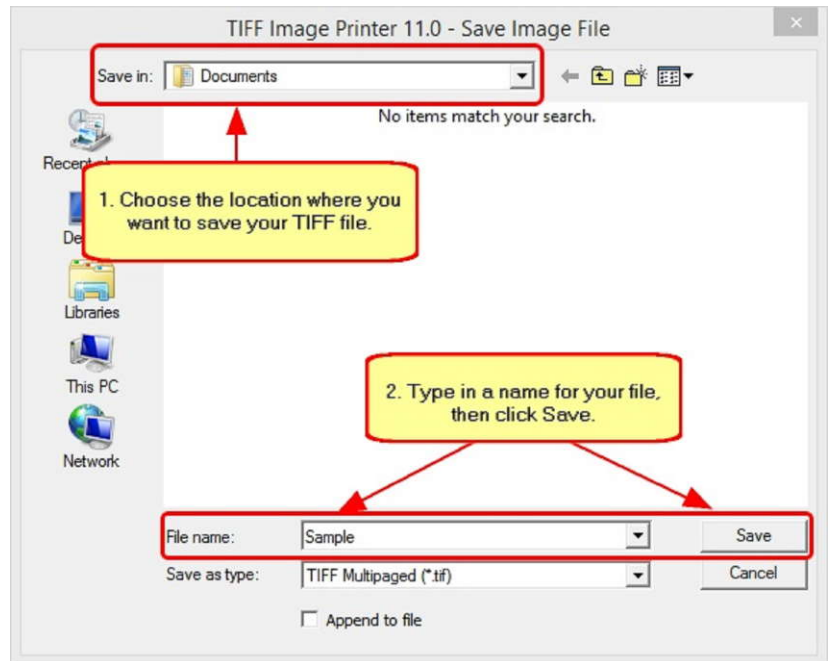

1. Open the Word file and then click **File->Print** from the application menu.

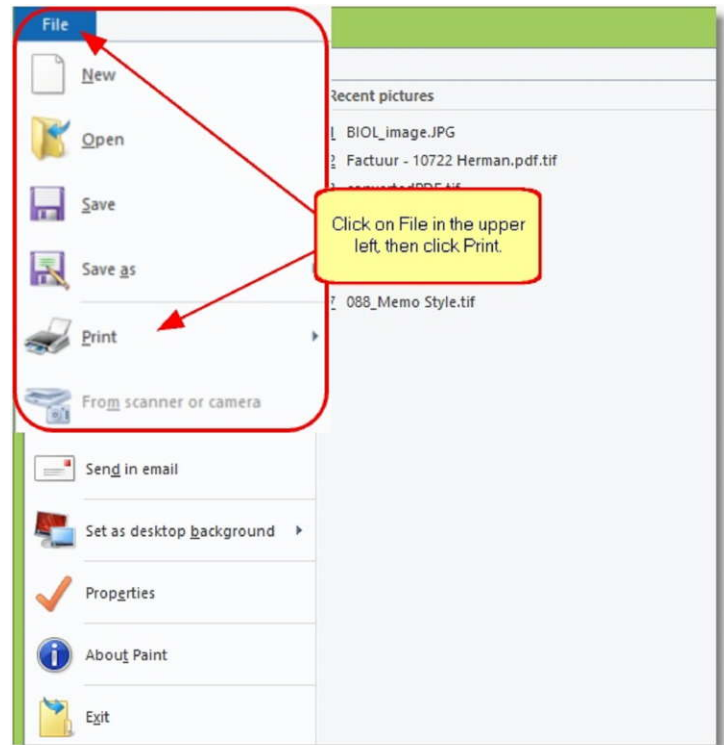

2. Choose **TIFF Image Printer** from the list of printers and then click the **Print** button.

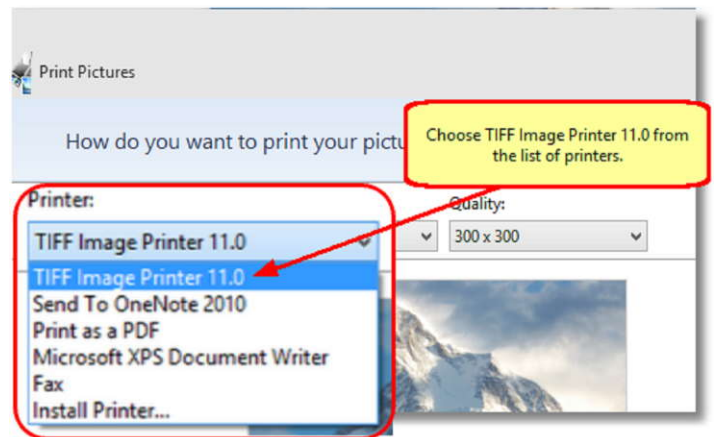

3. Enter the location and filename for the TIFF file and then click Save.

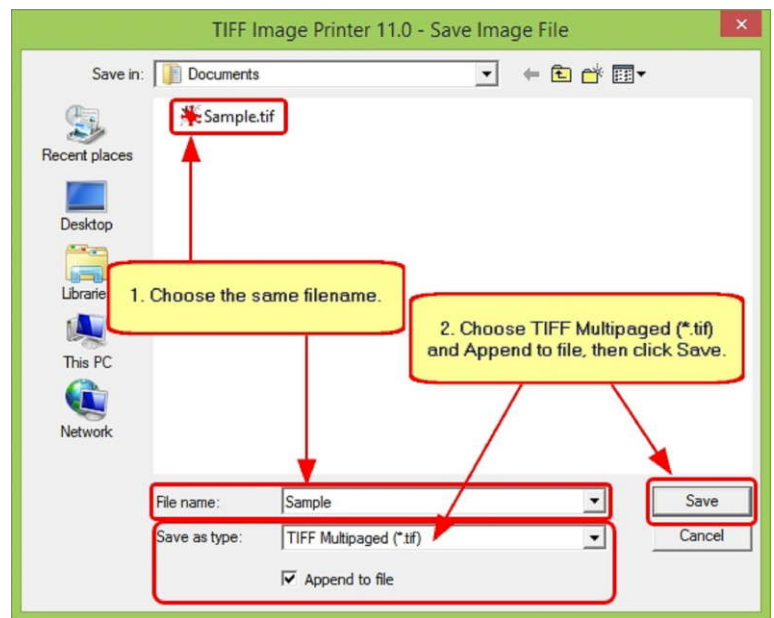

4. Open the JPEG image and click **File->Print** from the application menu.

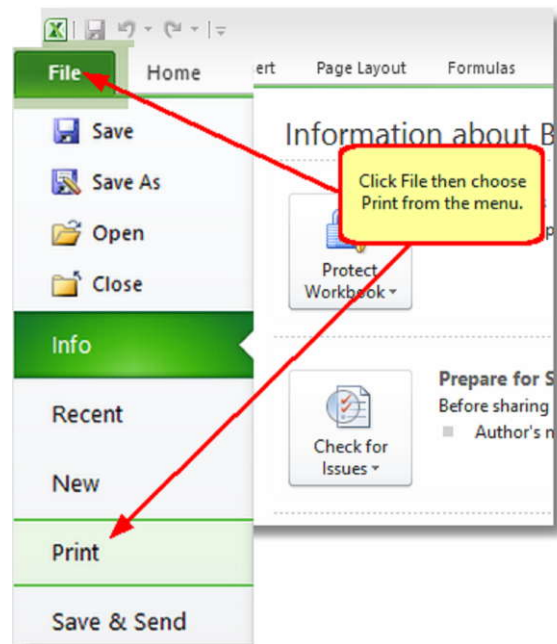

5. Choose **TIFF Image Printer** from the list of printers and then click the **Print** button.

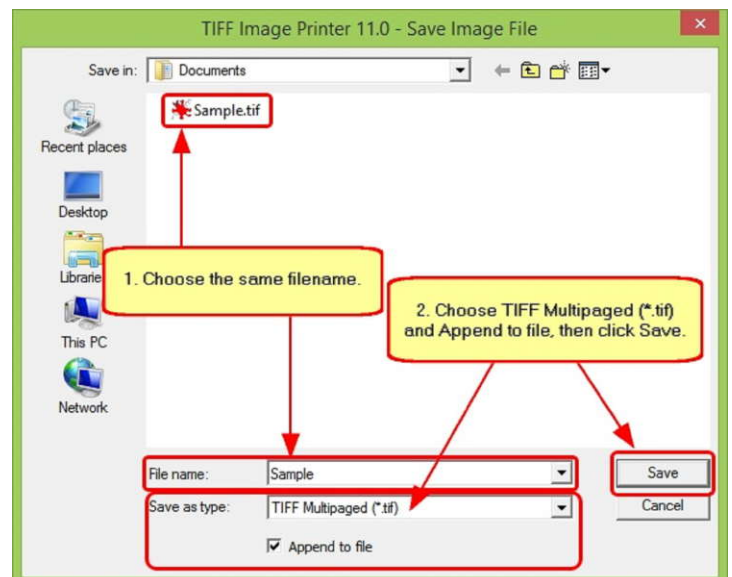

6. Enter the same filename, choose TIFF Multipaged (*.tif) and check Append to file, then click Save.

7. Now open the Excel spreadsheet and click **File->Print** from the application menu.

8. Enter the same filename, choose TIFF Multipaged (*.tif) and check Append to file, then click Save.

9. Now all 3 files are merged together in a single TIFF file.
