

PEERNET TIFF Image Printer

How To Convert DWG Files to TIFF Files

OVERVIEW

In just a few clicks you can easily convert **DWG to TIFF!**

As easy as printing, **TIFF Image Printer** works with any Windows® CAD program, such as Autodesk AutoCAD® so you can quickly convert your large scale drawings from DWG to TIFF in seconds, making it the DWG to TIFF converter you will turn to time and again.

WHY CONVERT DWG TO TIFF?

Convert your DWG to TIFF images to protect the information in your drawings before sending them to clients. TIFF images are very difficult to alter and can be viewed by virtually anyone. TIFF is a common format for faxing, and is often used by print shops, and in document archiving and eDiscovery software.

STEPS FOR CONVERT DWG FILE TO TIFF FILE

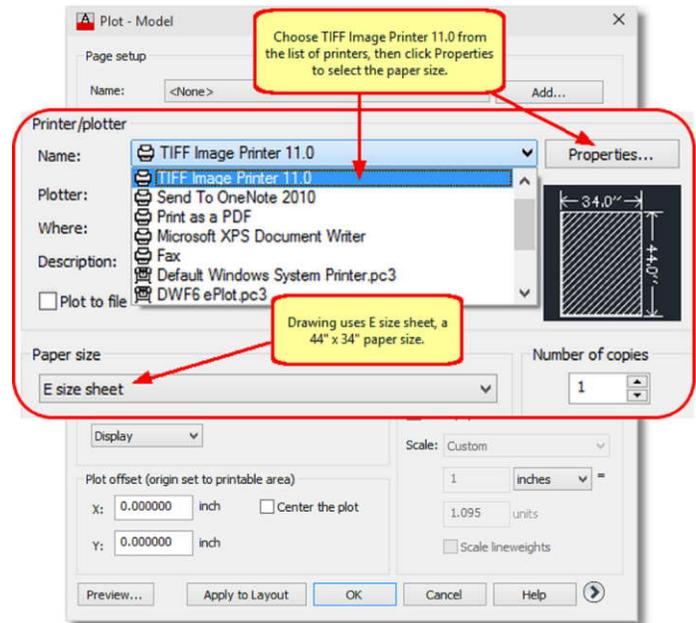

1. Install **TIFF Image Printer** onto your computer. This will create a new virtual printer in your *Printers* folder.

2. Open your DWG drawing in AutoCAD® and select the **Plot** icon (or select **File->Plot** from the menu).

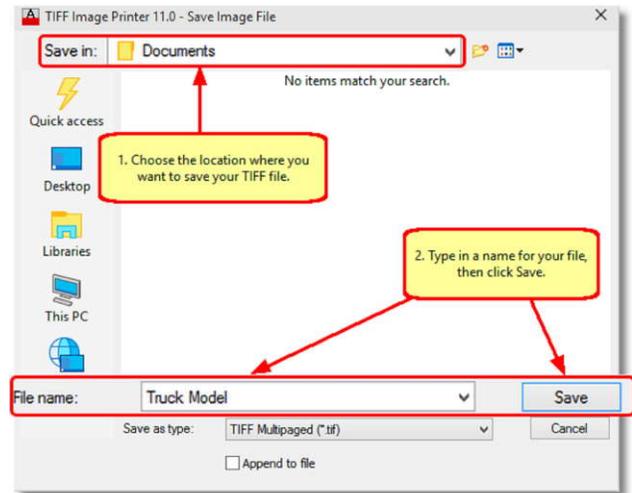

3. Set the **Printer/plotter** to TIFF Image Printer 11.0 printer. When plotting drawings on a large paper size, click the **Properties** button to set the desired paper size on the printer. Click **OK** to plot your drawing.

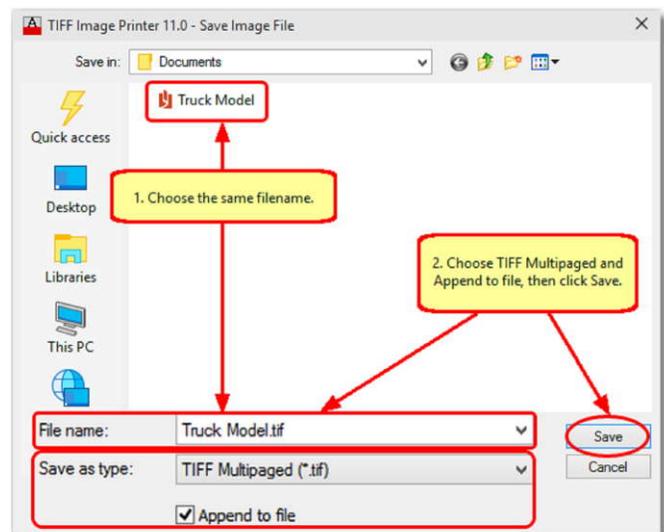

4. In the **Save Image File** dialog that appears:

- a. Select **TIFF Multipaged (*.tif)** as the output file type and choose where to save your new TIFF image.
- b. Click the **Save** button to convert your DWG to TIFF.

5. Your DWG drawings will be converted to TIFF and saved in the location specified.

6. Merge multiple DWG drawings into a single TIFF with the **Append** feature.

7. Convert DWG drawings into TIFF images that meet your exact requirements with the many options available. The settings used when converting DWG to TIFF can be accessed through the **Print** dialog when you are printing your drawing. See [Setting Printing Preferences](#) in the on-line user guide for more information.
