

# PEERNET TIFF Image Printer

How To Convert Email to TIFF

## OVERVIEW

As easy way to convert your **Email to TIFF** images – just print your message to the TIFF Image Printer to quickly convert it to a TIFF image in seconds.

Use the append feature to combine more that one email to TIFF or create separate TIFF images for each email message.

Convert more than email to TIFF, TIFF Image Printer works with any Windows® application making it the **TIFF converter** you will turn to time and again.

## WHY CONVERT EMAIL TO TIFF?

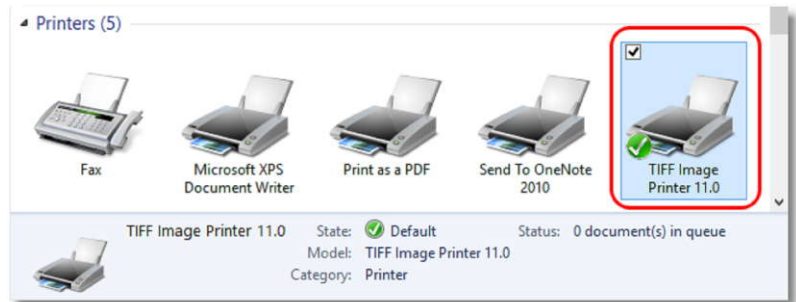

As a primary method of business communication, convert email to TIFF images to archive and protect confidential information. TIFF images are very difficult to alter and can be viewed by virtually anyone. TIFF is a common format for faxing, and is often used in document imaging, document archiving and eDiscovery software.

## STEPS FOR CONVERTING EMAIL TO A TIFF FILE

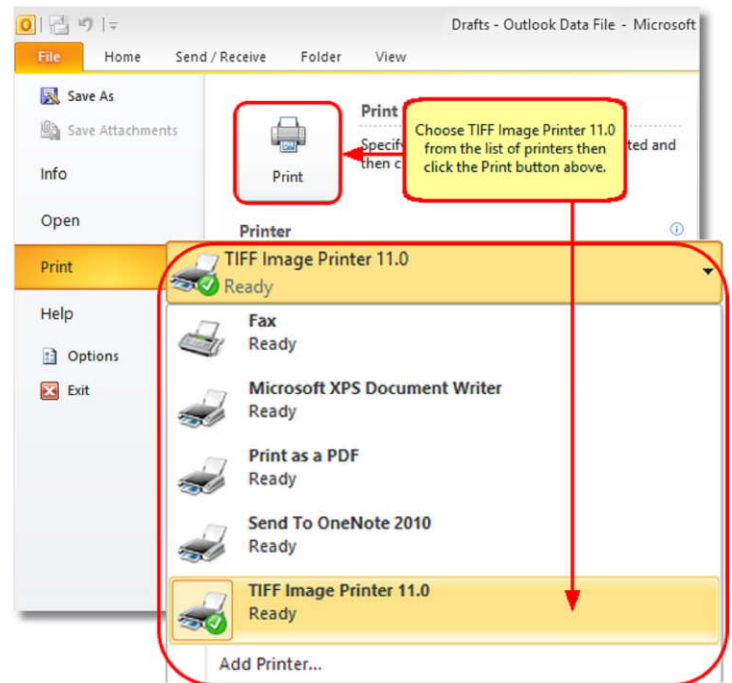

1. Install **TIFF Image Printer** onto your computer. This will create a new virtual printer in your *Printers* folder.

2. In your email program, such as Microsoft Outlook, find and open the email message you want to convert to TIFF, then select **File -> Print**.

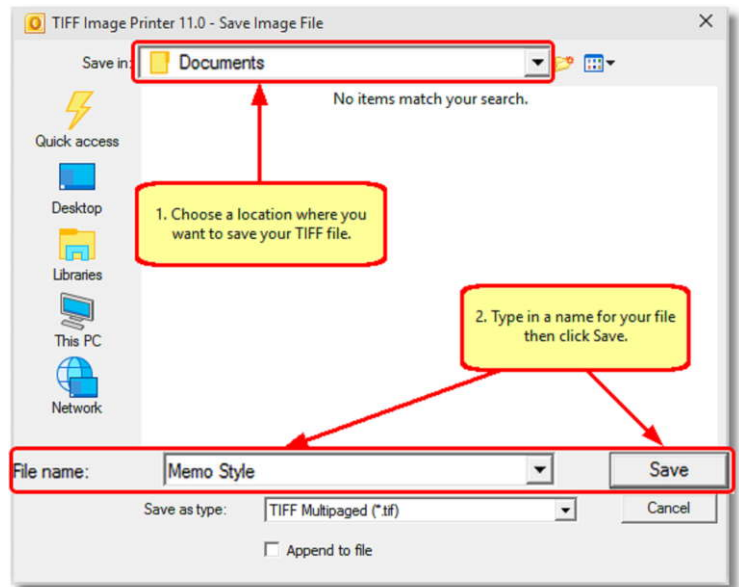

3. Choose TIFF Image Printer 11.0 from the printers list, then click the **Print** button.

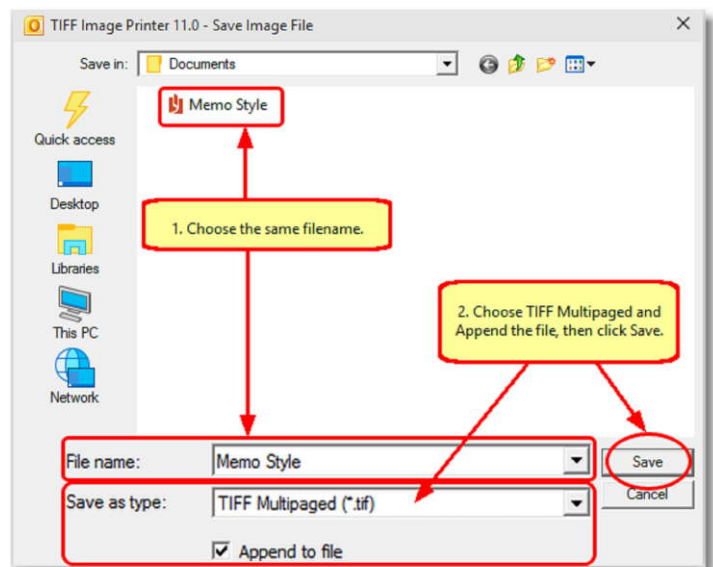

4. In the **Save Image File** dialog that appears:

- Select **TIFF Multipaged (\*.tif)** as the output file type and choose where to save your new TIFF image.
- Click the **Save** button to convert your **email to TIFF**.

5. Your email message will be converted to a TIFF image and saved in the location specified.

6. Merge multiple email messages into a single multipaged TIFF image with the **Append** feature.

**7.** Convert your email messages into TIFF images that meet your exact requirements with the many options available. The settings used when converting email to TIFF can be accessed through the **Print** dialog when you are printing your messages. See [Setting Printing Preferences](#) in the on-line user guide for more information.
