

PEERNET TIFF Image Printer

How To Convert Excel to TIFF

OVERVIEW

Convert your spreadsheets from **Excel to TIFF** in just a few clicks!

As easy as printing, **TIFF Image Printer** works with any Windows® application so you can quickly convert Excel to TIFF in seconds, making it the Excel to TIFF converter you will turn to time and again.

WHY CONVERT EXCEL TO TIFF?

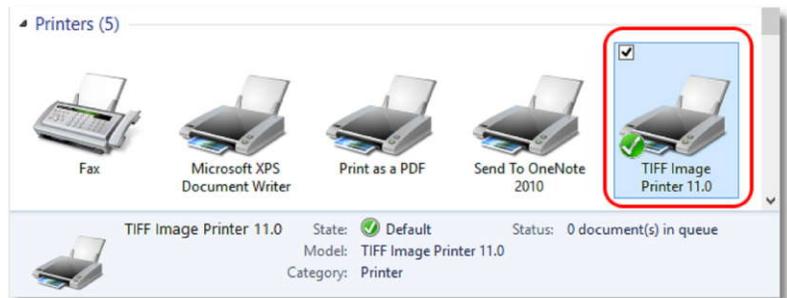

Convert Excel to TIFF images to protect the information in your Excel files. TIFF images are very difficult to alter and can be viewed by virtually anyone. TIFF is a common format for faxing, and is often used in document imaging, document archiving and eDiscovery software.

STEPS FOR CONVERT EXCEL TO A TIFF FILE

1. Install **TIFF Image Printer** onto your computer. This will create a new virtual printer in your **Printers** folder.

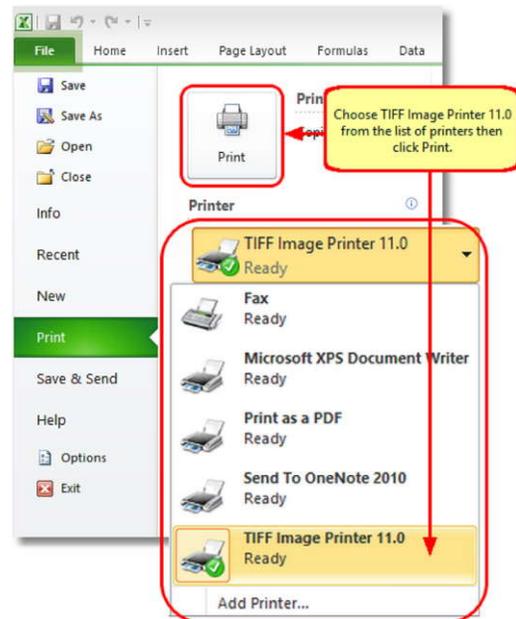

2. Open your spreadsheet in Microsoft Excel and click **File->Print** from the application menu.

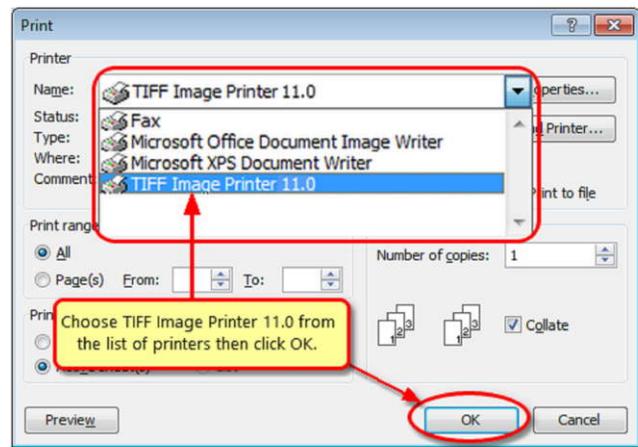

3. Choose TIFF Image Printer 11.0 from the printers list, then click the **Print** button or the **OK** button.

- You will see this if you are printing from **Excel 2010**:

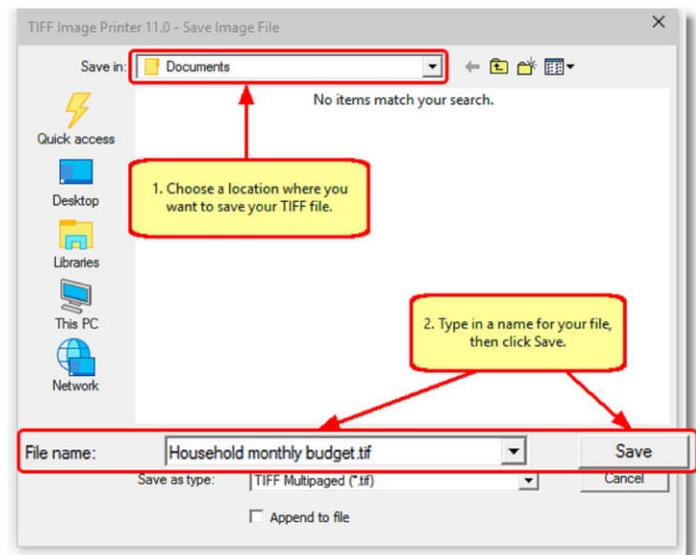

- You will see this if you are printing from **Excel 2007 and earlier**:

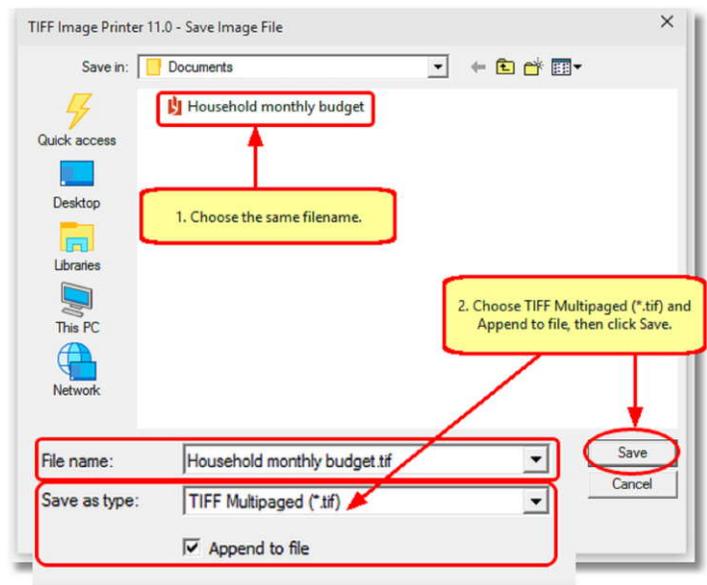

4. In the **Save Image File** dialog that appears:

- Select **TIFF Multipaged (*.tif)** as the output file type and choose where to save your new TIFF image.
- Click the **Save** button to convert your Excel to TIFF.

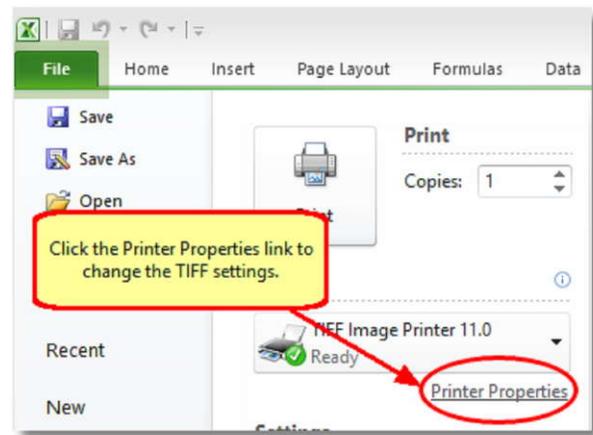

5. Your Excel document will be converted to TIFF and saved in the location specified.

6. Merge multiple Excel documents into a single TIFF with the **Append** feature.

7. Convert Excel into TIFF images that meet your exact requirements with the many options available. The settings used when converting Excel to TIFF can be accessed through the **Print** dialog when you are printing your spreadsheet. See [Setting Printing Preferences](#) in the on-line user guide for more information.
