

PEERNET TIFF Image Printer

How To Convert to TIFF with TIFF Image Printer

OVERVIEW

Convert to TIFF from any document!

Whatever you want to convert to TIFF – Microsoft Office documents, AutoCAD drawings, files from custom in-house software – if you can print it, TIFF Image Printer can convert it.

TIFF Image Printer can create TIFF images by printing from any Windows® application – making it the “go-to” solution for **TIFF conversion** you will turn to time and again.

WHY CONVERT TO TIFF?

Convert to TIFF to Protect – TIFF images are very difficult to alter which makes TIFF format ideal for protect the information in your files.

Convert to TIFF to Combine – Use the append feature to combine documents from different applications into a multipaged TIFF image for easy distribution.

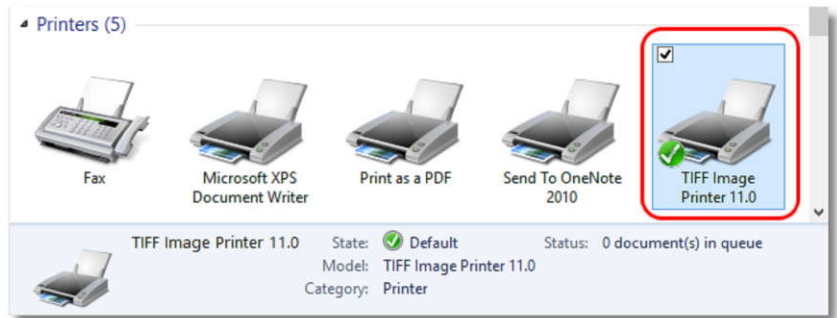

Convert to TIFF to Share and Store– TIFF is a common format for faxing, is often used in document imaging, document archiving and eDiscovery software and can be viewed by virtually anyone.

STEPS FOR CONVERTING TO TIFF FILE

1. Install **TIFF Image Printer** onto your computer. This will create a new virtual printer in your *Printers* folder.

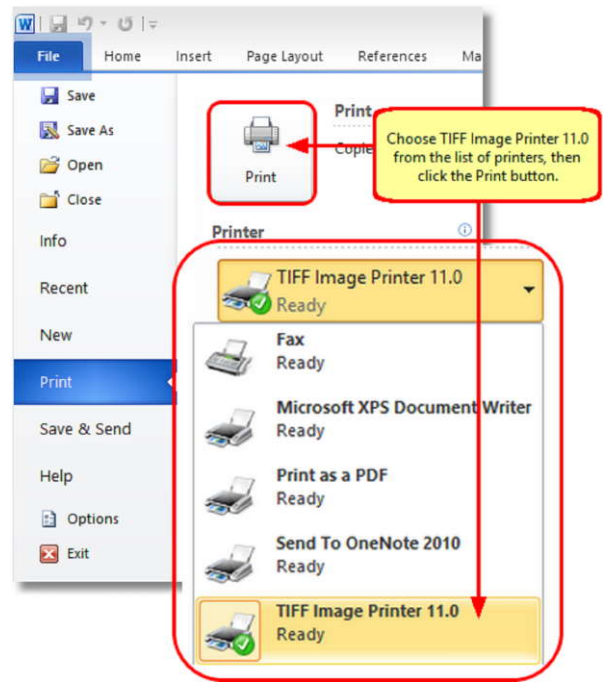

2. Open the desired file; here a document in Microsoft Word is used.

Select **File-> Print** from the application menu.

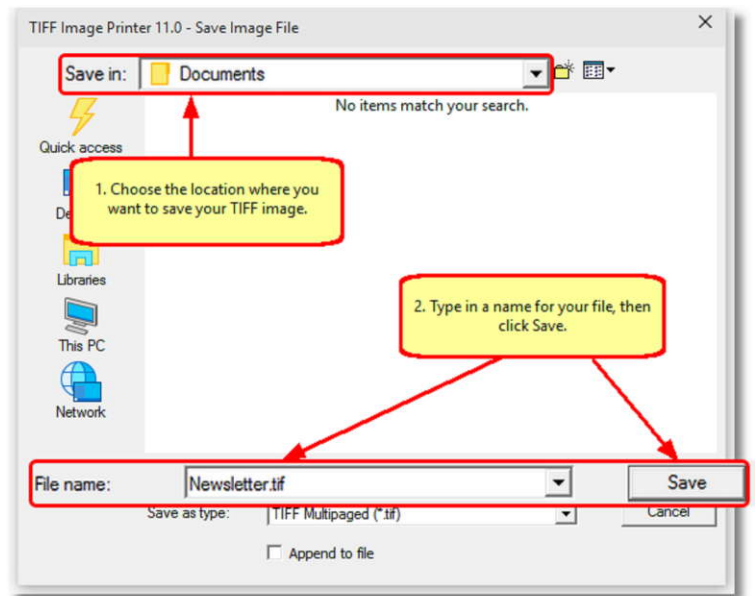

3. Choose TIFF Image Printer 11.0 from the printers list, then click the **Print** button.

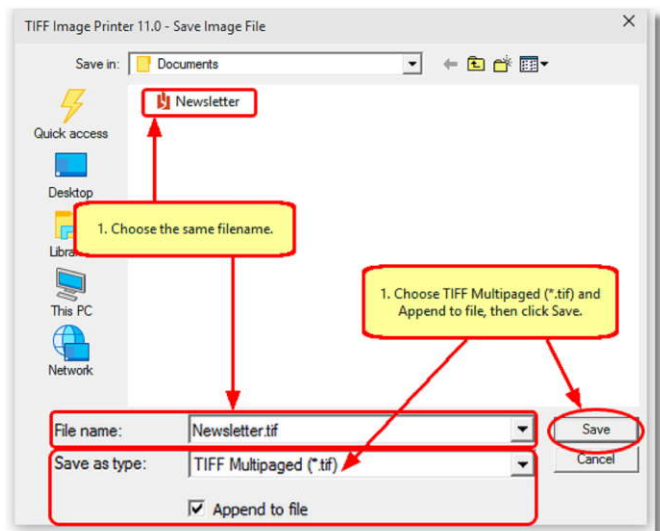

4. In the **Save Image File** dialog that appears:

- Select **TIFF Multipaged (*.tif)** as the output file type and choose where to save your new TIFF image.
- Click the **Save** button to convert to TIFF.

5. Your document will be converted to TIFF and saved in the location specified.

6. Merge multiple documents into a single TIFF with the **Append** feature.

7. Create TIFF images that meet your exact requirements with the many options available. The settings used when converting to TIFF can be accessed through the **Print** dialog when you are printing your document. See Setting Printing Preferences in the on-line user guide for more information.
