STEPS FOR CONVERT WEB PAGES TO TIFF FILES

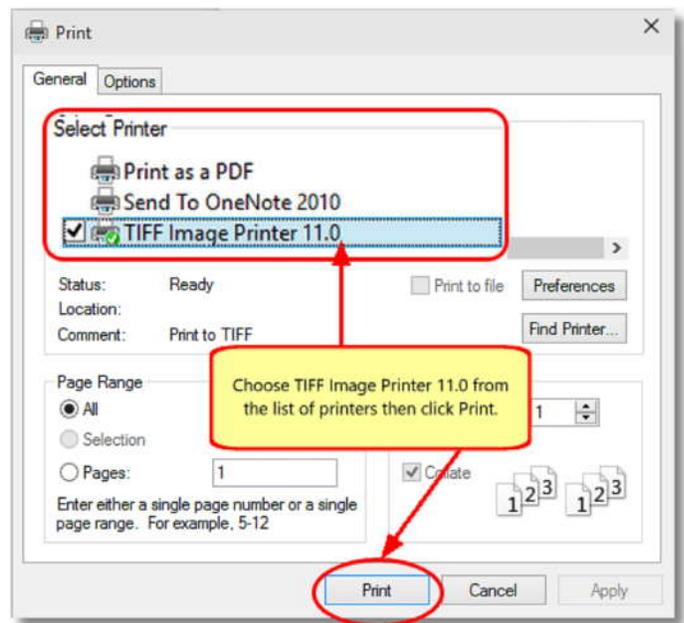

1. Install [TIFF Image Printer](#) onto your computer. This will create a new virtual printer in your *Printers* folder.

2. Open your web page in Internet Explorer or any other web browser. To open the **Print** dialog in Internet Explorer type *Ctrl-P* or click the *Settings* cog and then choose **Print->Print...** from the menu.

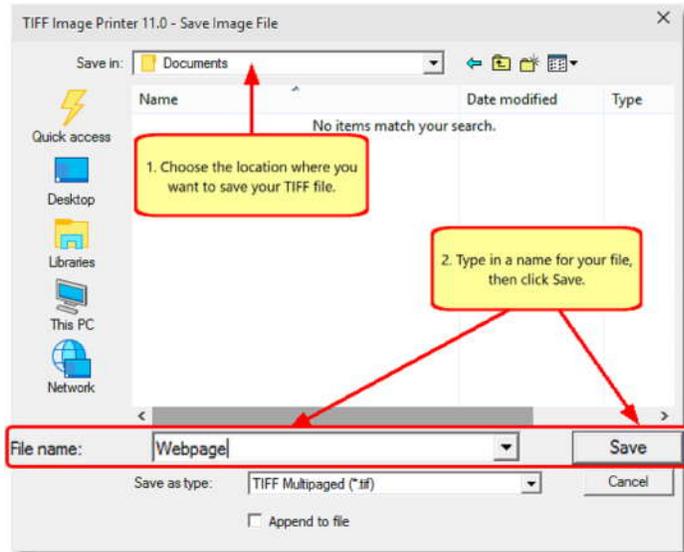

3. Choose TIFF Image Printer 11.0 from the printers list, then click the **Print** button.

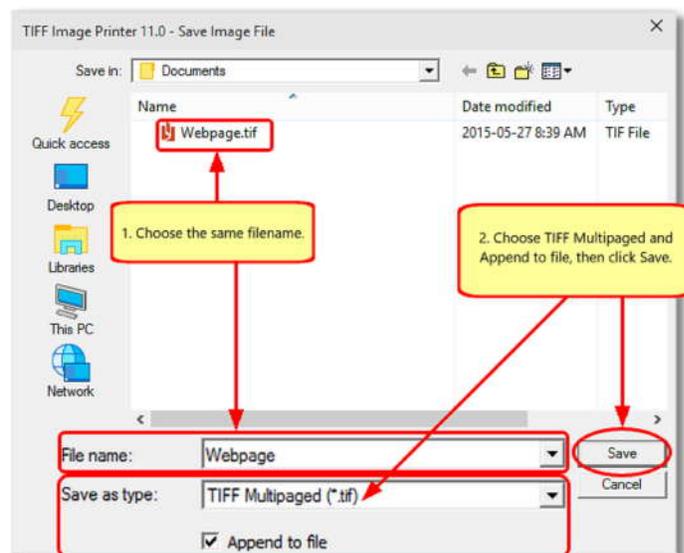

4. In the **Save Image File** dialog that appears:

- a. Select **TIFF Multipaged (*.tif)** as the output file type and choose where to save your new TIFF image.
- b. Click the **Save** button to convert your **web pages to TIFF**.

5. Your web page will be converted to a TIFF image and saved in the location specified.

6. Merge multiple web pages into a single multipaged TIFF image with the **Append** feature.

7. Convert your web pages into TIFF images that meet your exact requirements with the many options available. The settings used when converting web pages to TIFF can be accessed through the **Print** dialog when you are printing your web page. See [Setting Printing Preferences](#) in the on-line user guide for more information.
