

TIFF Image Printer has been successfully installed on your computer. Using TIFF Image Printer is a simple, 3-step process:

## 1. OPEN AND PRINT YOUR DOCUMENT

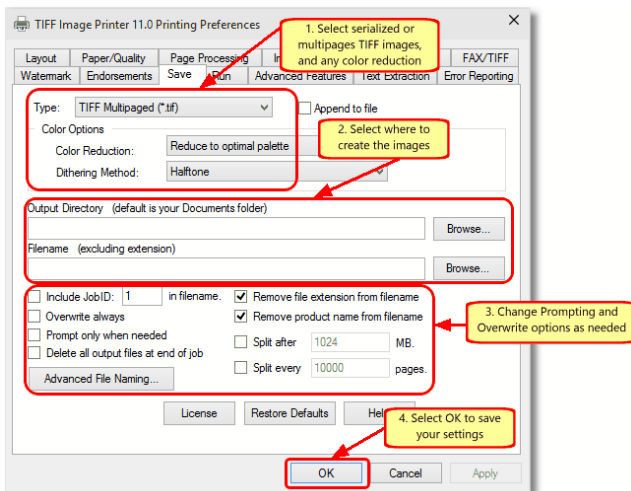

Select the *Print* option from your application's menu to send your document to the TIFF Image Printer.

1. Choose TIFF Image Printer 11.0 from the printers listed in the Print dialog.
2. Click on the Properties button to change the TIFF Image Printer properties such as where to save the file, or what compression method to use.

## 2. SET PRINTER SETTINGS

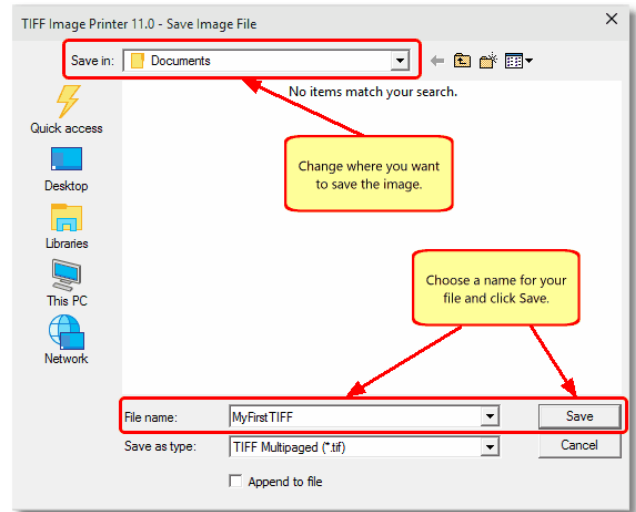

The TIFF Image Printer Document Properties dialog contains tabs of options that can be configured. The most common tabs used are the Save, Compression and Fax/TIFF tabs.

1. TIFF image files can be serialized, where each page of your document is saved as a separate TIFF image; or multi-paged where your entire document becomes a single TIFF file containing a separate image for each page. You can also choose any *Color Reduction* options such as *Reduce to Black and White*.
2. In the Output Directory and Filename fields, you can specify where to store the files and an optional filename to use. A blank filename will default to the printed document name.
3. Change Prompting and Overwriting options as required. These options control when the Save Image File dialog appears.
4. Select OK from the TIFF Image Printer 11.0 Document Properties dialog to close the properties dialog and print your file.

## 3. SAVE YOUR FILE

Selecting Print from the Print dialog will send your document to the TIFF Image Printer driver and the Save Image File dialog will appear.

1. Browse to the location where you want to save the TIFF image.
2. The name of the printed document is already filled in for you but you can enter a different name if desired.
3. Press the Save button to finish the process.

## COMMON QUESTIONS

How do I change the TIFF Image Printer properties so that all applications use the same settings?

*From the Start menu, select All Programs – TIFF Image Printer 11.0 – Printing Preferences.*

How can I configure the driver so that the Save Image File dialog box does not show every time I print?

*On the Save tab of the TIFF Image Printer Document Properties dialog, enable the Prompt Only When Needed and Overwrite Always options.*

How can I configure the driver to save all my files into the same folder?

*On the Save tab of the TIFF Image Printer Document Properties dialog, enter the desired folder in the Output Directory field.*

Still have questions?

*Contact the [PEERNET Technical Support](#) team with your question.*
